NINJA ZX-6R FEATURES

Large Brake Discs, Monobloc Calipers

Highly rigid, radial-mount monobloc calipers deliver a firm feel at the lever for superb control. Large ø310 mm disc brakes and a radialpump front brake master cylinder complete the front brake package, ensuring powerful braking with excellent feel. A ø220 mm disc brake and lightweight caliper slows the rear wheel. New round discs similar in style to those of the Ninja ZX-10R contribute to the strong Ninja ZX family image.

3D Interwoven Bodywork

Like the design of the tail cowl, the front and side cowls use interwoven layers to create a 3D effect, with the multiple layers adding to the high-class design. The bodywork's smooth, flowing design draws the eye from head to tail and hints at the Ninja ZX-6R's street-focused supersport performance.

Sporty Windshield

Short windshield contributes to the Ninja ZX-6R's supersport image. Like the Ninja ZX-10R, the front cowl supports the sides of windshield. Holes in the windshield relieve pressure build-up behind the screen to help reduce buffeting when riding at elevated speeds.

ADVANCED TECHNOLOGY

Traction control, supersport-grade brake management, selectable power modes and quick shifter are now complemented by fullcolour TFT instrumentation with a number of new features including smartphone connectivity and integrated Riding Modes.

Definitive Ninja Face

Compact new hybrid projector/reflector headlights are a key element of the Ninja ZX-6R’s new face. Mono-focus LED technology is supplemented by deep-set reflectors that make the unlit parts of the headlight appear dark, creating a fierce expression. The front cowl’s intricately layered design is complemented by winglet-style inlets and angled chin spoilers to form a highly distinctive image.

Integrated Riding Modes

Four integrated riding modes (Sport, Road, Rain or Rider (manual)) make it simple to select a level of traction control and power mode to suit the current riding conditions.
